

Zadara on AWS

Now you can get all the performance of an enterprise-class storage system, fully integrated with your AWS environment and account.

The control of enterprise storage. The convenience of Amazon Web Services.

Zadara provides the advanced features you have come to expect from enterprise storage, in a fully-managed cloud model. To make it even easier to accelerate AWS environments with Zadara's advanced capabilities, you can now purchase Virtual Private Storage Arrays (VPSAs) directly through AWS Marketplace and take advantage of consolidated billing.

Cloud-based NAS, SAN on AWS. Active Directory integration.

Zadara Virtual Private Storage Arrays provide file and block services that scale-up and scale-out, seamlessly, to optimize growing demands. Scale up by adding compute, memory, connectivity, or capacity resources to existing VPSAs. Scale out by adding new VPSAs to your Enterprise Data Cloud. Either way, all Virtual Private Storage Arrays furnish dedicated compute, memory, connectivity, and storage resources to ensure predictable performance while maximizing privacy and security.

AWS Direct Connect.

Zadara is available in 16 (and counting) AWS regions via AWS Direct Connect.

High-Availability. Backup to S3.

You can automatically back up your Zadara VPSAs to Amazon Simple Storage Service (S3) storage.

Consolidated billing and management.

No additional accounts to set up and manage and no separate billing. Easily track your account's charges in your AWS account and receive only one consolidated bill.

Features & Benefits

Enterprise

NFS, CIFS (AD), snapshots, high availability, and more

Flexible

All-flash, all hard disk, and flash plus hard disk hybrid options

AWS Integrated

Cubes are billed directly through your AWS account

100%

Uptime guarantee

“With the combination of AWS and Zadara Storage, we’re getting better performance than what we had from an on-premises solution, and saving at least 50% of our data center costs.”
