

Backup to Object Storage

Backup to Object Storage provides simple, cost-effective data protection leveraging object-based storage

Create automatic, snapshot-based backups to object storage.

Zadara’s Backup to Object Storage (B2OS) enables Zadara customers to create automatic, snapshot-based, continuous, incremental backups to low-cost object storage. B2OS eliminates the need for host-based backup software and provides an easy-to-use, high-performance, block-based, backup process.

Features & Benefits

Set & Forget

Automatic, snapshot-based incremental, backups

New Tiers

Use B2OS as a Tier 2 and Glacier as Tier 3

Flexibility

Restore data from B2OS to any vendor – Zadara, Amazon, or other

Zadara customers can also migrate data from Amazon S3 to Amazon’s Glacier cold storage, creating new tiers of data protection. And data backed up by B2OS can be restored to any storage medium from any vendor, including Zadara, Amazon, Google, or any other storage target required by the user.

Eliminate technical, operational, and financial risk.

Zadara eliminates the technical, operational, and financial risks associated with enterprise storage, by delivering industry-leading enterprise SAN, NAS and Object storage as a fully-managed service with 24/7 proactive monitoring and support, backed by a 100%-uptime guarantee, and wrapped in a pay-only-for-what-you-use model.

Transform your business with zero-risk enterprise storage.

Zadara transforms storage-related costs from a variable mix of equipment and management expenses to a predictable, on-demand, pay-per-use, elastic service that greatly simplifies planning, streamlines budgeting, and improves return on investment (ROI). Find out how zero-risk enterprise storage can help transform your business. Call or email today.
